

Growing up with Hitler

SAMPLE SLIDES

The presentation attempts to demonstrate how Adolf Hitler was able to capture the unquestioning allegiance of the majority of Germany's younger generation by following the life of an imaginary boy growing up in Germany during the years of the Nazi rise to power. Presents a child's view of life in a Germany moving from an unsettled society marked by disillusionment and economic hardship to a one party state, focused on the future and preparing for war. As the child's awareness increases, Hitler and the Nazi Party play a greater part in his daily life by offering excitement, fellowship and educational opportunities. Optimism persists until the experience of war finally brings home the truth.
